---

## Skills Summary

- Proficient in C#, SQL, JavaScript, Java, and Python programming languages.
- Experienced in developing websites using ASP.Net, CSS, and HTML.
- Skilled in designing and managing RDBMS such as MySql and MS Access.
- Comfortable working independently and in team environments, including Agile settings.
- Quick learner with a strong work ethic and ability to adapt to new technologies and methodologies.

## Work Experience

### Web Developer, VertexOne

Oct 2021 - Jan 2023 | Toronto, ON [remote]

- Contributed to the maintenance and enhancement of multiple full-stack projects utilizing C#, JavaScript, and MariaDB to ensure optimal functionality and user experience.
- Worked closely with project stakeholders using tools such as Jira and Microsoft Teams to communicate and achieve project objectives.
- Led the migration of a project codebase from SVN to Azure GitHub, resulting in a more modern deployment system.
- Earned recognition for effectively addressing and resolving a critical situation through proactive problem-solving and quick action.

### Game Programming Instructor, Real Programming 4 Kids

Sep 2021 - Sep 2022 | Toronto, ON [remote]

- Taught programming in Java, Python, and C# to students ages 7 to 17 using an in-house curriculum.
- Monitored student progress and provided regular verbal and written reports.
- Developed and updated course content to keep pace with the evolving tech landscape.

## Education

### Computer Programmer/Analyst Advanced Diploma

2021 | Conestoga College, Waterloo, ON

- Completed a full-stack project with a JQuery front-end, C# ASP.Net backend, and a MySQL database. Incorporated a machine learning script from Tensorflow to run image recognition and classify images submitted by users.
- Participated in the Seneca College 2021 Hackathon.
